Behr, Marion. [Surviving Cancer: Our Voices & Choices](#). WWH Pr. 2014. 268p. illus. index. ISBN 9780615856001. pap. \$20.95. **HEALTH**

The story of cancer is as individual as the person relating it. Artist and breast cancer survivor Behr here includes anecdotes from patients and recommendations from physicians and medical professionals in order to provide comfort and knowledge for those on the same journey. The plastic cradles used to immobilize patients during radiation therapy serve as Behr's inspiration and the source of the book's artwork. With questions patients and family members should be asking (and their answers) and a useful glossary. **VERDICT** Beautifully designed, a worthwhile addition to patient health holdings.
